

Follow-up for sarcoma according to SSG guidelines:

The length and intensity of the follow-up is decided by the treating physician and patient unless the patient is enrolled in a specific treatment protocol.

Patients are followed for at least 5 years from diagnosis or last relapse.

Patients are followed for at least 10 years if younger than 70 years.

Recommended follow-up intervals after primary treatment are as follows for:

<i>Years after diagnosis</i>	<i>Low-grade tumours</i>	<i>High-grade tumours</i>
<i>0–2</i>	<i>6 months</i>	<i>3 months</i>
<i>3</i>	<i>6 months</i>	<i>4 months</i>
<i>4–5</i>	<i>6 months</i>	<i>6 months</i>
<i>5–10 (optional)</i>	<i>yearly</i>	<i>yearly</i>

Young patients who have been treated with C and R

should have lifelong follow-up due to the risk for long-term toxicity.
